

Ideation Phase

Define the Problem Statements

Date	22 September 2026
Project Name	Online Complaint Registration and Management System

Customer Problem Statement Template:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Complainant / End User)	A citizen or customer who has encountered an issue with a product, service, or civic matter and wants it resolved.	Submit a complaint with relevant details and attachments, track its status in real time, see who is handling it, and give feedback once it is resolved.	Traditional complaint channels (calls, emails, in-person visits) give no visibility into progress and require repeated follow-up.	There is no centralized system linking complaint submission, status updates, and resolution feedback in one place.	Frustrated, ignored, and uncertain whether the complaint is even being worked on.
PS-2 (Administrator)	An administrator responsible for overseeing complaint resolution across agents.	View all incoming complaints, assign them to the right agent, monitor status changes, and track overall resolution performance.	Without a central dashboard, complaints get scattered across channels, assignments overlap, and it is hard to gauge agent workload or response time.	There is no single source of truth connecting complaint data, agent assignments, and status history.	Overwhelmed, unable to prioritize effectively, and lacking visibility into how efficiently complaints are being resolved.
