

Ideation Phase

Empathize & Discover

Date	22 September 2026
Project Name	Online Complaint Registration and Management System

Empathy Map Canvas:

What does he THINK AND FEEL?

- Wants a simple, transparent way to report an issue without repeated calls or emails.
- Worries the complaint will be ignored, lost, or take too long to get noticed.
- Hopes for a fair, timely resolution with clear communication from the agent handling it.

What does he HEAR?

- Friends and family sharing frustrating experiences with unresponsive support desks.
- Word-of-mouth about organizations that offer an online complaint-tracking portal instead of phone queues.
- Peers recommending platforms that show real-time status updates and agent contact.

What does he SEE?

- A simple registration and login screen to create an account.
- A dashboard listing submitted complaints with category and current status.
- A progress timeline showing the assigned agent and recent status changes.

What does he SAY AND DO?

- Securely creates an account and logs in via the registration/login forms.
- Submits a complaint with category, description, and supporting attachments.
- Checks the dashboard for status updates and submits feedback once resolved.

Pain (Fears, Frustrations, Obstacles)

- Fear that the complaint sits unassigned, with no one accountable for handling it properly.
- Frustration from not knowing which agent is handling the issue or how long resolution will take.

Gain (Wants, Needs, Measures of Success)

- Wants real-time visibility into complaint status without calling or emailing for updates.
- Success is measured by fast assignment, clear status tracking, and a resolution worth rating well.
