

User Acceptance Testing (UAT) Execution Document

Date	22 September 2026
Project Name	Online Complaint Registration and Management System

1. Project Overview & Testing Environment

- **Project Name:** Online Complaint Registration and Management System
- **Project Description:** A MERN stack application (MongoDB, Express, React, Node.js) with JWT-based role authentication, complaint submission and tracking, agent assignment, and post-resolution feedback.
- **Project Version:** v1.0.0
- **Testing Period:** 15 September 2026 to 22 September 2026

Testing Scope:

- User registration, login, and JWT-based authentication for Users, Agents, and Admins.
- Complaint submission with category/attachments, status tracking, and the complaint progress timeline.
- Administrator complaint assignment, status updates, summary statistics, and post-resolution feedback.

Testing Environment:

- **URL/Location:** Local Development Environment (Frontend: http://localhost:3000, Backend: http://localhost:5000)
- **Credentials:** User: testuser@example.com / password123 | Administrator: admin@example.com / adminpass123

2. Executed User Acceptance Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration & Login	1. Navigate to Register page. 2. Submit name, email, and password. 3. Log in with the same credentials.	Account is created with a hashed password; login returns a valid JWT token.	Account created successfully; JWT token received and stored.	Pass

TC-002	JWT-Protected Route Access	1. Attempt to access the Dashboard without logging in. 2. Log in and retry. 3. Verify role-based content.	Unauthenticated access is blocked; authenticated users see only their own complaints.	Unauthorized redirect worked; dashboard correctly scoped to the logged-in user.	Pass
TC-003	Complaint Submission with Attachment	1. Log in as a user. 2. Fill the complaint form with title, description, category, and attachment. 3. Submit.	Complaint is created with status OPEN and appears on the user's dashboard.	Complaint created successfully and listed with status OPEN.	Pass
TC-004	Admin Assigns Complaint to Agent	1. Log in as admin. 2. Open an unassigned complaint. 3. Assign it to an agent and update status.	Complaint status changes to IN_PROGRESS and the assigned agent is reflected on the complaint.	Status updated to IN_PROGRESS; assigned agent displayed correctly.	Pass
TC-005	Feedback Submission Auto-Closes Complaint	1. Log in as a user with a RESOLVED complaint. 2. Submit a rating and comment. 3. Refresh complaint details.	Feedback is saved and complaint status automatically changes to CLOSED.	Feedback saved; complaint status updated to CLOSED as expected.	Pass

3. System Defect Register & Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Complaint list did not refresh immediately after an admin reassigned a complaint to a different agent.	1. Log in as admin. 2. Reassign a complaint from one agent to another. 3. Check the complaint list without	Low	Closed	Frontend now re-fetches the complaint list after a successful assignment update.

refreshing.

BG-002	Feedback submission was allowed on complaints still in OPEN or IN_PROGRESS status.	1. Log in as a user. 2. Open a complaint with status OPEN. 3. Attempt to submit feedback.	Medium	Closed	Backend now validates that feedback can only be submitted when status is RESOLVED or CLOSED.
--------	--	---	--------	--------	--

4. Formal Acceptance Sign-Off

- **Tester Name:** Project Developer / Self-QA
- **Date of Test Completion:** 22 September 2026
- **Signature:** [Digitally Verified]

Notes & Deployment Prerequisites:

1. Core user flows (registration, login, complaint submission, tracking) have been tested and pass.
2. Known issues identified during testing have been resolved and verified.
3. Sign-off has been recorded for deployment readiness of the Complaint Management System.
